Texas Pacific Land Trust
Shareholder Presentation

Prepared in April 2019
SoftVest, L.P. ("SoftVest LP") has filed a definitive proxy statement (the "Proxy Statement") with the United States Securities and Exchange Commission (the "SEC") in connection with the solicitation of proxies for a special meeting of holders of the sub-share certificates of proprietary interests (the "Shares") for the election of a new trustee of Texas Pacific Land Trust ("TPL") to fill the vacancy created by the resignation of Maurice Meyer III (such meeting, together with any adjournments, postponements or continuations thereof, the "Special Meeting"). INVESTORS ARE STRONGLY ADVISED TO READ THE PROXY STATEMENT BECAUSE IT CONTAINS IMPORTANT INFORMATION. Investors may obtain a free copy of the proxy statement, any amendments or supplements thereto and other documents that SoftVest LP files with the SEC from the SEC’s website at sec.gov, or by contacting D.F. King, SoftVest LP’s proxy solicitor, by phone (212-269-5550) or e-mail (TPL@dfking.com).

SoftVest Advisors, LLC, SoftVest LP, Eric L. Oliver, ART-FGT Family Partners Limited, Tessler Family Limited Partnership, Allan R. Tessler, Horizon Kinetics LLC, Murray Stahl, Horizon Asset Management LLC, Kinetics Advisers, LLC, and Kinetics Asset Management LLC may be deemed participants in the solicitation of proxies from holders of Shares in connection with the matters to be considered at the Special Meeting. Information about such participants’ direct and indirect interests, by security holdings or otherwise, is contained in the Proxy Statement.
An Overview

Part 2: Investor Group’s Background and Nominee

Part 3: Texas Pacific Land Trust – Asset Overview

Part 3: Texas Pacific Land Trust – Recent Results

Part 3: Why Transformation Is Needed NOW

Part 4: Eric Oliver’s Actionable Plan
Executive Summary
TPL was created as a business trust in 1888 as part of the reorganization following the bankruptcy of the Texas & Pacific Railway ("T&P Railway"). As a trust, trustees should be held to a very high standard: a trustee is a fiduciary.

The sole intended purpose of the formation of TPL as a trust was to provide an orderly liquidation of the land that secured defaulted bonds of the T&P Railway. At the time, as there was no oil and gas activity on the lands and the objective was simply to oversee the liquidation of trust assets and the distribution of proceeds, a trust was the optimal business structure.

Since then, TPL deviated from this long held mandate with the creation of a water operating company, followed by complex land and royalty “trading” transactions. As such, the activities of TPL are clearly an operating business, which includes the reinvestment of nearly $100 million of shareholder capital annually.

We believe there is no precedent whatsoever for a company engaged in these active business activities to be structured as a business trust, nor any logical justification, in our view, to forego disclosures, controls and governance of a modern operating corporation.
Executive Summary

• Texas Pacific Land Trust (TPL) is a business trust created in 1888, and is currently one of the largest landowners in Texas.

• TPL’s revenues derive primarily from royalties from oil and gas; revenues from easements, leases and land sales; and sales of water.

• TPL continues to be governed as a liquidating business trust from the late 19th century:
  • No annual meeting of shareholders
  • Board is composed of only three trustees, who serve **life appointments**
  • Shareholders only get to vote on a trustee replacement when incumbent dies, resigns or is disqualified
  • Only four shareholder meetings in 30 years!

• We believe poor governance record and lack of accountability has resulted in:
  • Lack of transparency to investors
  • Rampant conflicts of interest
  • Questionable business decisions
  • Total disregard for investors’ view and rights, as evidenced by the conduct of incumbent trustees during this proxy campaign.

• The long-term holders of over 25% of the outstanding shares have nominated Eric Oliver, who has been a TPL investor since 2005, to fill a newly created vacancy.

• As one of three trustees, Eric is committed to encourage the Trust to convert to a Delaware corporation subject to modern governance standards, and will provide the industry knowledge and expertise that in our view the Board otherwise lacks.
Investor Group’s Background and Nominee
Investor Group

Heavily vested and rooting for the success of TPL

HORIZON KINETICS Participants
- Horizon Kinetics is an independent, employee owned registered investment adviser, investing alongside and serving clients since 1994.
- Horizon has beneficially owned Shares since 1994.
- Collectively own 1,798,184 Shares (23.2% of the Outstanding Shares).

SOFTWARE Participants:
- SoftVest LP is a hedge fund specializing in the ownership of oil and gas minerals and royalties.
- Mr. Oliver, Managing Member, has beneficially owned Shares since 2004.
- SoftVest LP, Mr. Oliver and other affiliated entities collectively own 133,200 Shares (1.7% of the Outstanding Shares).

TESSLER Participants
- Mr. Tessler has beneficially owned Shares since 2015.
- Collectively own 11,630 Shares (0.1% of the Outstanding Shares).

Long-term investors, collectively own over 25.1% of outstanding TPL Shares.

SOFTWARE Participants Include: SOFTWARE, L.P., SOFTWARE ADVISORS, LLC, ERIC L. OLIVER
TESSLER Participants Include: ART-FGT FAMILY PARTNERS LIMITED, TESSLER FAMILY LIMITED PARTNERSHIP, ALLAN R. TESSLER
HORIZON KINETICS Participants Include: MURRAY STAHL, HORIZON ASSET MANAGEMENT LLC, KINETICS ADVISERS, LLC, KINETICS ASSET MANAGEMENT LLC
Investor Group Nominee: Eric Oliver

Background: Well-Qualified Nominee with Long Term Vested Interest

**AN EXPERIENCED OIL AND GAS INVESTOR WITH OVER 22 YEARS OF EXPERIENCE BUYING AND SELLING PROPERTIES AND OVER 35 YEARS OF EXPERIENCE MANAGING INVESTMENTS WITH AN EMPHASIS IN THE ENERGY MARKET.**

- Currently serves as the President of SoftVest Advisors, a registered investment adviser that acts as an investment manager for clients, including funds and managed accounts, with investments in oil and gas minerals and royalties.

- Previously President of Midland Map Company, LLC, a Permian Basin oil and gas lease and ownership map producer since 1997, and recently sold in January 2019 to Drilling Info.

- Principal of Geologic Research Centers LLC, a log library providing geological data to the oil and gas industry with a library in Abilene, Texas.

- Served on the Board of Directors of Texas Mutual Insurance Company since 2009, where he currently also serves as Chairman of the Investment Committee, with over $6.5 billion of total assets.

- In 2007, through certain affiliated entities, Mr. Oliver led a team to successfully acquire the assets of the Santa Fe Energy Trust (formerly NYSE ticker SFF), which consisted of over 12,000 royalty and working interest properties in at least seven states.

In this brief video, Eric introduces himself and talks about his history with TPL: [https://vimeo.com/330849206/5eb7b8d692](https://vimeo.com/330849206/5eb7b8d692)
Texas Pacific Land Trust (TPL)
Asset Overview
Texas Pacific Land Trust ("TPL")

Background

**Primary Assets**
- 902,177 surface acres, with water rights, in West Texas
- 370,737 1/16th Non Participating Royalty Interest ("NPRI") Acres
- 84,934 1/128th Non Participating Royalty Interest ("NPRI") Acres

**Business Lines**
- Oil & Gas Royalties
- Land Easement and Sundry Income
- Water Sales & Royalties
- Water Easements & Sundry Income

**Issuer Information**
- Ticker: "TPL", the second oldest trading security on NYSE, subject to both NYSE rules and the Securities Exchange Act of 1934
- Market Capitalization: approximately $7 billion (as of 4/19/19)

</table>

The water royalty business was growing at over a 200% rate in 2017 prior to the creation of TPWR.

Drilling activity and production subject to TPL acreage since this time has increased nearly three-fold. Yet, (connect the dots.)

Management’s lack of disclosure prevents us from determining the actual returns on the $62 million capital investment, 7-fold increase in employees and 15-fold increase in salaries and employees expenses related to the formation of the company.
Recent Results

Water Sales & Royalties

- **Strong spending tailwinds**
- **Tighter well spacing**
- **Tighter frac clusters**
- **Higher proppant and water loads**
- **Higher oil & gas production**

**Higher Water Demand**

**Permian Gusher**

Spending on water management is forecast to nearly double in next five years.

Why Transformation is Needed NOW
Why Transformation Is Needed NOW

Lacking Modern Corporate Governance Standards

**Trustees/General Agents Lack of Relevant Experience**

- Trustees have spent their careers as attorneys and lack any relevant oil & gas experience.
- Trustees acknowledge that no current member of the Board of Trustees would meet the definition of an “audit committee financial expert”.
- General Agents (the CEO and CFO) have limited/no oil & gas experience beyond current roles.

**Trustees and General Agents Serve Lifetime Appointments**

- Trustees are not accountable to shareholders:
  - Trustees serve life terms until “death, resignation or disqualification”. Investors in a public company should simply not be forced to think of a trustee’s tenure in terms of his or her life expectancy.
- TPL has only held four shareholder meetings in thirty (30) years.

**No Modern Governance Principles**

- Trustees have no accountability to a board of directors or shareholders.
- Trustees provide little or no information regarding capital allocation or compensation:
  - Trustees recently increased their own pay 52x, while increasing management pay over 10x without shareholder approval or disclosure.
Why Transformation Is Needed NOW

Virtually No Alignment of Interest

**Management & Trustees Own Minimal Stock**

- Total inside ownership in the stock is 1,600 Shares, including only 300 by the General Agents – less than 0.03% of outstanding Shares.

- This current inside ownership level is a dramatic decline and the lowest level over the past 30 years.

- At recent prices, total stock ownership by 2 Trustees and 2 General Agents combined is less than either of the bonuses paid to the 2 General Agents.

- The General Agents are incentivized to continue to earn their annual large cash salaries and bonuses (which are tied to short-term profits); unlike shareholders, they have little to gain by way of long-term stock price appreciation.
Why Transformation Is Needed NOW

Lacking Transparency and Disclosures

Conflicts of Interest are Ignored and Not Disclosed

• The previous General Agent (CEO) assigned large surface acreage rights to a private operator prior to leaving TPL to work for the very company involved in the transaction.

• TPL failed to disclose that its initial nominee to fill the vacant Trustee position, Preston Young, works for Stream Realty in Houston. Stream Realty manages 3 buildings in Houston that are owned by a current Trustee’s firm. TPL subsequently replaced Preston Young as nominee with its current candidate.

• One of the current Trustees also serves as President of Tarka Resources, which merged with Manti to form Manti Tarka Permian, LP (“Manti Tarka”). Manti Tarka has drilled on TPL’s NPRI in Pecos County. Additionally, TPL also owns surface acreage around the wells being drilled by Manti Tarka, so it is unclear if Manti Tarka have engaged in any transactions relating to surface use rights or easements and who, if anyone, other than the conflicted Trustee has approved these transactions.
Why Transformation Is Needed NOW

Lacking Relevant Experience and Network

**In Our View, Current Management Has Demonstrated Poor Judgment**

- In 2011, without disclosure—TPL swapped 15,746 surface acres and 13,211 gross 1/16 non-participating royalty interest (NPRI) along the state line in Culberson County for Mineral Classified acreage in central Culberson (Chevron is developing the acquired property while no activity has taken place on the Mineral Classified property).

- In 2018, TPL sold 14,000 Surface Acres in Loving/Reeves County in an area that TPL’s most recent—and only—presentation describes as a “Core Surface Position” without rationale.

- In 2018-2019, TPL sold Midland Basin NPRI to Chevron, which had pristine title, and then purchased a broad swath of low NRI properties around the Midland Basin, again with no disclosure or justification.

- In 2018, TPL purchased surface acreage in Hudspeth, Concho and Mitchell counties. There is little to no drilling activity in these counties and there has been no discussion by management as to why purchasing this land is more attractive than buying back units.

(continued next page)
Why Transformation Is Needed NOW

Lacking Relevant Experience and Network (cont’d)

In Our View, Current Management Has Demonstrated Poor Judgment (Cont’d)

- Management has spent over $62 million on an active water business that requires large capital expenditures and employee management, with limited disclosure and without shareholder approval.

- 2018 was the lowest percentage of revenue allocated to the retiring of shares in the history of TPL, despite the 50%+ drop in stock price during the 4th quarter and the significant cash position.

- TPL’s recently filed—and only—presentation highlights 10 wells drilled on or around TPL’s NPRI position in the Delaware Basin. 5 of the 10 wells highlighted by TPL are in the wrong location, some by more than 20 miles, with one well listed in the wrong county.
Why Transformation Is Needed NOW

While we have kept this campaign honest and fair, management has chosen to use hyperbole to demonize large long-term shareholder

Sample TPL Management Social Ads (filed by TPL with the SEC on 4/10/19:

Facebook:
“There’s a storm on the horizon. Texas Pacific Land Trust and its legacy of value creation are under threat by a dissident group putting its own interests before those of other shareholders. Retired 4-star General Donald Cook is the ONLY candidate who will advance TPL’s strategy for the benefit of ALL shareholders. Make your voice heard. Vote FOR General Cook on the BLUE card. Protect your Trust. Trust General Cook.”

Twitter:
“There’s a storm on the horizon. TPL is under threat by a dissident, self-serving group. General Don Cook is the ONLY candidate who will advance TPL’s strategy for ALL shareholders. Make your voice heard. Vote FOR Cook on the BLUE card. Protect your Trust.”

Google:
“Texas Pacific Land Trust. Proven strategy is now at risk. Vote for Gen Cook on BLUE Card. TPL outperformed the market with returns of 733% since 2014. More than Apple or Amazon! TPL is vital to Texas history https://www.trusttpl.com/”

Who is paying for an expensive website, designers, PR advisors and now a social media campaign?

We believe buying back shares is a better investment than Google ads.

How is holding TPL shares for 10 and 25 years “dissident” and “self-serving”? 
Why Transformation is Needed NOW
The Trustees Should Embrace and Work Collaboratively With Eric Oliver
TPL’s Management Already Seeks Him Out For His Knowledge and Expertise

We firmly believe that, despite their recent rhetoric that includes unsubstantiated references to “serious concerns with the dissident nominee’s judgment and intentions”, TPL’s trustees appreciate the expertise and depth of knowledge that Eric Oliver brings to the table.

In fact, on April 14, 2019, Robert Packer, TPL's Chief Financial Officer, emailed Kline D. Oliver, Vice-President of SoftVest Advisors LLC, requesting an updated list of drilled, completed and permitted wells on TPL non-participating royalty interest property that Mr. Oliver maintains based on his dedicated ongoing research.

Mr. Oliver has shared similar information in the past with TPL’s management at their request and at no cost – despite TPL’s offer to pay for such work.

Mr. Oliver promptly provided the list to Mr. Packer, even after being the target of a distasteful attack letter issued by TPL that morning.

Mr. Oliver is, among other things, a source of deep expertise and knowledge about TPL and the industry which in our view will immensely enrich the Board.

We Call For Basic Fairness in Shareholder Communications
Why Transformation is Needed NOW

**Changed their Nominee And Failed to Disclose Conflicts**

- TPL switched their nominees between the filing of their preliminary proxy statement and their definitive proxy statement, only after Mr. Oliver’s nomination was made public.

- TPL failed to disclose that its initial nominee to fill the vacant Trustee position, Preston Young, works for Stream Realty in Houston. Stream Realty manages 3 buildings in Houston that are owned by a current Trustee's firm. TPL subsequently replaced Preston Young as nominee with its current candidate.

**Access to Shareholders**

- Have refused to turn over their NOBO list, DTC List and omnibus proxies, all of which are in their possession.

- Sent over a scan of the registered holder list (not in electronic form, per industry standard) that our team had to then manually organize and build into a spreadsheet.
Eric Oliver’s Actionable Plans
Mr. Oliver’s Plan

If Elected, Mr. Oliver Intends to Encourage the Other Two Trustees to:

CREATE A BOARD OF DIRECTORS
- Board will operate according to modern governance standards with requisite independent members and disclosures
- Include several oil and gas professionals, in addition to an expert for the Audit Committee
- Evaluate all significant capital allocation decisions

PROVIDE SHAREHOLDERS WITH BASIC RIGHTS
- Implement annual elections for all directors

INCREASE DISCLOSURE
- Include drilling, rig, well, capital expenditure and various additional data to better inform shareholders
- Hold annual investor meetings and provide quarterly earnings calls

ACTIVELY ENGAGE WITH PARTNERS IN THE PERMIAN BASIN
- Evaluate the best practices for working with oil and gas companies and infrastructure companies

RECOMMIT TO RETURNING CAPITAL TO SHAREHOLDERS
- Management has de-emphasized buybacks and dividends in order to pursue capital investments
- Board will define return on capital hurdles and set parameters for stock repurchases and dividends

DEVELOP WATER BUSINESS TO MAXIMIZE SHAREHOLDER VALUE
- Provide water team with seasoned board for expansion and development
- Assess various types of water ventures to limit risk and maximize long-term growth
- Work with oil and gas partners to ensure both source and produced water requirements are met for decades of production
# The Opportunity to Improve
