

Small Cap Institutional Composite

As of 6/30/2017

Investment Approach

- Horizon's small cap strategy targets small or emerging companies possessing substantial barriers to entry, long product life cycles and sound capital structures; on occasion companies may be less mature companies and in the process of developing a superior product or market niche.
- Generally, holdings are expected to benefit from higher valuations either through revaluation, growth or a combination thereof. The strategy emphasizes small capitalization companies similar to the S&P SmallCap 600 Index. The strategy may invest in non-US companies and, on a limited basis, participate in special situation opportunities.

Portfolio Construction

- Horizon maintains a long-term investment perspective and seeks to avoid significant portfolio turnover. Consistent with our historical experience, we expect turnover to be in the 20% to 25% range per annum over an extended period.
- The portfolio typically invests in 30 to 50 securities and position sizes generally range from 0.5% to 10.0%.
- The portfolio seeks to manage co-dependency across business models and does not measure risk versus a specific benchmark.

Investment Time Horizon:

5+ Years

Representative Benchmark:

S&P SmallCap 600 Index

Assets Under Management:

Definitions: Historical Statistics

- Excess Return is the measurement of a portfolio's return minus the return of the representative index.
- Standard Deviation is a statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution.
- Tracking Error is the standard deviation of a portfolio's return relative to a benchmark.
- Sharpe ratio is a statistical measure that uses standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio implies a better historical risk-adjusted performance. Morningstar chooses a risk-free benchmark based on the portfolio's domicile, e.g. the 3-month Treasury bill for portfolios based in the United States.
- Information Ratio is a ratio of portfolio returns above the returns of a benchmark (usually an index) to the volatility of those returns.
- Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.
- Up-Market Ratio is the statistical measure of an investment manager's overall performance in up-markets. The ratio is calculated by dividing the manager's returns by the returns of the index during the up-market.
- Down-Market Ratio is the statistical measure of an investment manager's overall performance in down-markets. The ratio is calculated by dividing the average manager's returns by the average returns of the index during the down-market.
- Turnover is the lower of total buys or total sells divided by the average market value of the account. Turnover ratio is calculated by Fiserv APL.
- Active Share is a measure of the percentage of holdings in a portfolio that differ from a benchmark index. It is calculated by taking the sum of the differences of the weight of each holding in the portfolio and the weight of each holding in the benchmark index and dividing by two. Active share is measured against the strategy's primary benchmark.

Important Disclosures

Horizon Asset Management Institutional ("Horizon Institutional" or "the Firm") is defined as the traditional long only separate accounts and private investment fund assets of Horizon Asset Management LLC. ("Horizon" or the "Firm"), an SEC-registered investment adviser and a wholly owned subsidiary of Horizon Kinetics LLC. Horizon Institutional excludes separately managed, non-direct accounts and other accounts that either are serviced by wrap/dual contract sponsors or utilize a wrap or bundled fee structure. Horizon Institutional claims compliance with the Global Investment Performance Standards (GIPS®). A GIPS® compliant presentation and/or a list of composite descriptions are available upon request by contacting CSBD@horizonkinetics.com.

The Small Cap Institutional Composite ("Strategy") seeks above market long-term returns by investing primarily in a focused portfolio of small companies of global issuers with long product life cycles and insulated business models that possess the ability to generate high, sustainable returns on invested capital. On February 1, 2017 the benchmark for the Small Cap – Institutional Composite was changed retroactively from the Russell 2000 index to the S&P Small Cap 600 Index. The S&P 600 Index is a stock market index from Standard & Poors that covers roughly the small cap range of US stocks, using a capitalization-weighted index.

Performance is expressed in USD. Past performance does not guarantee future results and the value of the investments and the income derived from them may increase or decrease. Note that indices are unmanaged and the figures shown herein do not reflect any investment management fee or transaction costs. Investors cannot directly invest in an index. References to market or composite indices, benchmarks or other measures of relative market performance (a "Benchmark") over a specific period are provided for your information only. Reference to a Benchmark may not reflect the manner in which a portfolio is constructed in relation to expected or achieved returns, portfolio guidelines, correlation, concentrations, volatility or tracking error targets, all of which are subject to change over time. The Strategy is a total return strategy and the benchmark is provided for illustrative purposes only. It is not our intention to state, indicate or imply in any manner that our future results will be profitable or equal past results.

Unless otherwise noted, the portfolio characteristics shown above relate to the composite as of the date noted above. Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) market prices of individual securities at the time of investment; (iii) and individual client circumstances. The Firm reserves the right to modify its current investment strategies and techniques based on changing market dynamics or issue size. This Strategy may invest in both equity and fixed income securities without regard to market capitalizations or issue size. Horizon does not necessarily fully invest portfolios immediately after an account is funded. There can be no assurance that any securities discussed herein will remain in an account. The securities discussed may not represent an entire account and in the aggregate may represent only a small percentage of an account's holdings.

The following applies to all of the indices used in this document: Indices are presented merely to show general trends in the markets for the period and are not intended to imply that the strategy is benchmarked to the indices either in composition or level of risk. The indices are unmanaged, may or may not be investable, have no expenses and reflect reinvestment of dividends and distributions. Index data is provided for comparative purposes only. A variety of factors may cause an index to be an inaccurate benchmark.

Risk Considerations: Investing in securities entails risk, which may include but not be limited to the following: When investing in securities, the market may not necessarily have the same value assessment as the manager and, therefore, the performance of the securities may decline. Under no circumstance does the information contained herein represent a recommendation to buy, hold or sell securities. All material presented is compiled from sources believed to be reliable, but accuracy cannot be guaranteed. The information presented is subject to further clarification during presentations and may not be duplicated or communicated without our consent.

The information should not be used as a general guide to investing or as a source of any specific investment recommendations and makes no implied or expressed recommendations concerning the manner in which an account should or would be handled, as appropriate investment strategies depend upon specific investment guidelines and objectives. This is not an offer or solicitation to any person in any jurisdiction in which such action is not authorized or to any person to whom it would be unlawful to make such offer or solicitation. Horizon Kinetics does not provide tax or legal advice to its clients and all investors are strongly urged to consult their tax and legal advisors regarding any potential strategy or investment.
